Accessibility review.

We reviewed sections of the website based on the themes and layouts that were used in the creation of the pages.
We have:
- Content pages
- Category pages
- Event pages
- News pages
- The home page

We used this list and selected 3 from each category (excluding the homepage which is a unique page) we ran tests to highlight any potential issues with the format, design and layouts.

Using tools listed on https://www.w3.org/WAI/ER/tools/

Further reviews will be completed across all pages including pages in development. This will be completed once any highlighted site-wide issues have been resolved.

This document will be updated with any details of new reviews completed.
