Introduction

Lying in the heart of Test Valley, the wide picturesque High Street reflects its early role as part of a drovers road where it was common to see flocks of sheep or herds of cattle being driven through the town en route from Wales. Seek out the Drovers House and you can still spot a sign in Welsh. The town of Stockbridge, with its long and varied history, has inspired many poets over the years and there is a trail of ten poems, set in stone, metal plaques and etched glass, for you to follow as you wander through the town, discovering its treasures.

A brief history

The River Test flows through this delightful Hampshire town. Its wide street has an abundance of eateries and independent retailers including outdoor pursuits, fashion and gift shops.

Stockbridge means, literally, a bridge over the river. On a causeway of compressed chalk laid down in the remote past to cross the River Test, Stockbridge is almost midway between Andover to the north and Romsey to the south. The river is shallow and divides here into five streams which thread their way through the marshy meadows and under the main road.

There were settlements on Stockbridge Down from at least the second millennium BC; within a short distance are the impressive earthworks at Danebury, Meon Hill and Woolbury. Two ancient roads meet and cross at Stockbridge, one running east to west between Winchester and Old Sarum, later Salisbury, and the other running north and south along the valley of the Test. The prosperity of Stockbridge has always stemmed largely from the roads which pass through it.

The valley here is wide enough to have provided a river crossing since earliest times and a posting station in Roman times on the road from Winchester to Sarum. The 'town' (actually little more than a single row of buildings on each side of the wide main street) grew in importance when Welsh drovers rested there with their flocks on their way to various sheep fairs and markets in the South East. A thatched cottage known as 'Drovers House' has the message in Welsh painted on the wall: 'Seasoned hay, tasty pastures, good beer, comfortable beds'.

Stockbridge has a 12th century chapel, now known as St Peter's, which was served by the 'head-minster' at King's Somborne, as were other chapels in the 'hundred'. Thus, although Stockbridge became a flourishing small borough, which eventually gained parliamentary representation, it never had a parish church of its own until 1848. Its inhabitants were duly christened, married and buried, but in a chapel served from King's Somborne.

Walks and trails

Stockbridge lies at the heart of the beautiful Test Valley and features many circular walks for the casual walker, some of which link into longer distance routes. Wonderful features are close at hand: Stockbridge Marsh, which walkers can reach direct from the High Street and Stockbridge Down, with its panoramic views across the valley, are both owned by the National Trust. Just up the hill towards Salisbury is one of the most famous Iron Age hill forts in England - Danebury. The Sprat and Winkle Line, once a railway line linking Southampton and Andover, is now part of the Test Way long distance footpath and runs through Stockbridge. For further information visit: www.testvalley.gov.uk/communityandleisure/tourism/visiting-test-valley

Stockbridge to Mottisfont Walk

Using the old railway line, the path passes through Stockbridge Common - a quiet world of reedbeds and waterfowl. Here, beside the water, the Clarendon Way (which stretches from Winchester to Salisbury) crosses the valley just before you reach the ancient crossing point of Horsebridge. Continue past one of the few remaining old railway stations (now privately owned). On to Lower Brook, cross the meadows and finish this section on grass tracks at the famous Mottisfont Abbey, a National Trust property whose walled kitchen garden holds the national collection of old-fashioned roses. www.3.hants.gov.uk

Testway Walk

This 44-mile long-distance walking route takes you from its dramatic start, high on the chalk downs at Inkpen, to follow much of the course of the River Test to Eling where its tidal waters flow into Southampton Water. This is without doubt Hampshire's longest and finest chalk stream, world famous for its superb trout fishing (not for public use).

There are many other visitor attractions within easy-striking distance of Stockbridge and even more picturesque villages around the area to explore. It has three churches and like many of the beautiful villages in the Test Valley, these are celebrated in a leaflet and book called *The Churches of Test Valley*. Also look out for the *Test Valley Visitor Guide* available from the Visitor Information Centre in Romsey.
