Subject: Test Valley local plan

Hello, One of my major points which I am sure a lot of residents in test valley comment about is the environment we live in is poorly managed , does not make the areas we live in feel special or pleasing, not the town centres, time should be spent looking at ways to improve the management of local areas , older estates, etc, As some residents who cannot visit town centres this is all they see ,and there are a lot of issues to be addressed I strongly believe new development is great, but you must not overlook existing structure and communities as everyone should be enjoying where they live and regard it as special
Thankyou
