Subject: Sustainable development

I would like to encourage TVBC to promote sustainable development, such as that proposed for Timsbury Deeping:

1. Minimise carbon emitted through building construction.
2. Emit no carbon in heating buildings.

3. Generate surplus electricity on site.
4. Minimise water use and harvest rainwater.
5. Process sewage and waste water on site using domestic treatment plants and an Integrated Constructed Wetland.
6. Maximise local food production, selling surplus via the Farm Shop.
7. Maximise ecological opportunities increasing biodiversity far above the levels present on a traditional housing development.
