

Hello

This is not a formal response from the Parish Council but my observations on the accuracy of your data as it applies to this parish.

- You show Plaitford as having an “H” for its public transport and whilst this is correct for the few properties which are situated near the A36 most dwellings are so far away that using the service requires a walk of between 1 and 2 miles. Surely the spread of properties should have featured in the assessment.
- You show that the parish has access to superfast broadband, which again is correct for a few properties, however, most do not even achieve 7Mbps. Indeed we are involved in a project with Openreach to try to get FTTP because our current speeds are so low.

I appreciate that you have tried to provide a simple ranking but without considering the distribution of facilities across the parish you are likely to give an overly favourable impression of availability. Perhaps a facility available to 50% of properties would have been a more reasonable criterion, although this would clearly have required more effort.

Regards, Jane

Jane Wright
