Given the rural context of the district the Plan would benefit from a landscape led approach, particularly given the importance at present of environment, climate change and biodiversity

Q8

Comment 1:

Supporting text makes reference to listed buildings, conservation areas focused on heritage but does not recognise the 2 nationally designated protected landscapes in the area. Needs to be recognised early on as it sets the scene for the document and policies.

Section 5 - delivery of housing

Q22

Comment 8:

Acceptable split of north and south housing areas and target percentage of growth. Welcome the affordable homes viability study and 40% affordable home for developments, we would encourage the trigger to be 10+ as this is the trigger for a major application. NPPF sets a lower trigger for housing in AONB 5+ but this can be delivered by off site contributions. Needs to be addressed in supporting text that there is a separate approach in AONBs where there is a need for affordable homes but the sites are not coming forward to provide this.
