Insert any general comments that do not relate to a specific paragraph number or policy in the general comments box below.*If you are suggesting a change is needed to the draft Local Plan or supporting document, it would be helpful if you could include suggested revised wording. If you are commenting on a document supporting the draft Local Plan (such as a topic paper, or the Sustainability Appraisal), please indicate so.

I am writing to express my strong objection to the proposed plans for further residential and industrial development in Nursling and Rownhams. As a resident deeply invested in the preservation of our local environment and the well-being of our community, I am deeply concerned about the detrimental effects these developments will have on our countryside, wildlife, and existing infrastructure.

Our countryside is not just a backdrop for development; it is an essential part of our local identity and ecosystem. Any further encroachment on it would irreversibly diminish the natural beauty of our area, impacting the health and well-being of both residents and wildlife alike. The destruction of habitats for wildlife is not only ethically questionable but also ecologically damaging, disrupting fragile ecosystems and threatening biodiversity.

Moreover, the proposed development would exacerbate the strain on our already overburdened infrastructure. Our roads, schools, healthcare facilities, and other public services are already struggling to cope with the demands of our current population. Adding more homes and industrial estates without adequate provisions for infrastructure improvements would only lead to further congestion, pollution, and decreased quality of life for residents.

I urge the council to reconsider these plans and prioritize the preservation of our countryside, wildlife habitats, and existing communities over short-term economic gains. Instead of sacrificing our natural heritage for the sake of development, I implore you to explore alternative solutions that promote sustainable growth while safeguarding the unique character and environment of Nursling and Rownhams.

Furthermore, I believe that meaningful consultation with local residents and environmental experts is essential in making decisions that will shape the future of our community. Transparent and inclusive decision-making processes are vital for building trust and ensuring that the concerns and interests of all stakeholders are taken into account.

In conclusion, I urge the council to listen to the voices of residents who are deeply concerned about the impact of further development on our countryside, wildlife, and existing infrastructure. Let us work together to create a future where sustainable development coexists harmoniously with the preservation of our natural environment and the well-being of our community.

Thank you for considering my objections.
