Insert any general comments that do not relate to a specific paragraph number or policy in the general comments box below.*If you are suggesting a change is needed to the draft Local Plan or supporting document, it would be helpful if you could include suggested revised wording. If you are commenting on a document supporting the draft Local Plan (such as a topic paper, or the Sustainability Appraisal), please indicate so.

We have lived in Rownhams for over 26 years. We have noticed over the years that many changes have been made to our village. It feels a very different place to when we moved here.

What has concerned us is the development and rise in population but no input into supporting the already overstretched resources within this area.

Over the years we have seen a significant loss of the countryside and trees which has led to harm of wildlife and the landscape character of this area. The developments that have already taken place have had a significant effect on our local roads and infrastructure. There appears to be minimal strategic planning in managing the impact of these developments.

I am opposed to the development of Upton triangle land. I am concerned over a number of issues:

The huge impact on our already overstretched local resources.

The significant and unacceptable pollution from extensive artificial lighting, traffic and operational noise/vibration/disturbance.

The significant impact it will have on our local roads and lack of transport infrastructure.

The adverse effects on air quality.

And again we will witness a significant loss of countryside and trees and its devastating impact on the local wildlife.

Sadly we have experienced erosion of our village and we are losing the green boundaries of this community village.
