I live in Pennard Way so will be directly affected by this scheme. My main fear (and it is a huge fear) is the flooding that will invariably come with this and I am right in the firing line for this. I am essentially at the bottom of a continuous slope from the fields designated for this plan. My garden is literally a quagmire as it is all winter. My patio is partially under water at the moment as it is. With nowhere to soak into the rain will invariably make it's way down to my property and I have serious concerns about my house flooding. Will you build drains into gardens such as mine? I live at [REDACTED]
[REDACTED] You are welcome to come and have a look at the position I am in. Flooding is already a huge issue already in the area. Just look at the roads, the gardens and the paths. I feel absolutely petrified about this. Especially as the single mother of a 14 year old autistic girl. I have no family to support me if something goes wrong so I would like to know who from the council, who approves this crazy scheme, will come and help me? Who will cover me if my house floods and no one will insure me?
I am absolutely petrified about all of this.
On top of the flooding the traffic will be a terrible and catastrophic issue but it is the flooding, given exactly where I live, that is my biggest worry.

Penny Batchelor
