

12 November 2025

The proposed stopping up of Western Avenue and West Street will cause severe congestion and because of the plan to make an already busy one way system into a two way road will bring with it dangers to old and young pedestrians. Several hundred students from a nearby expanding college will have to cross the proposed two way road. In addition a large group of elderly people who live on West Street will struggle to get to local facilities.

Apart from this a considerable amount of money will need to be spent with no obvious benefit to the town and its growing population.

Please consider this plea from one of the elderly people who will be affected.
