

27 February 2025

We thank you for your comprehensive response to our concerns relating to this matter.

Your response, however, does not adequately address our health and safety concerns and, consequently, we must advise you of our wish to maintain our objection. It is our belief that a Public Inquiry is desirable and necessary in order to have all of the pertinent issues thoroughly examined and discussed in a public forum where those most impacted can have every opportunity to fully participate.

We also wish to thank you for your much appreciated efforts to enhance the environment and improve the public facilities of the delightful town of Andover, to which we are newly introduced and with which we are greatly impressed.
