

See It Stop It – Adult Safeguarding App

Hampshire Safeguarding Adults Board has developed an app for smart phones, **See It, Stop It** intended to provide everyone with an understanding of safeguarding adults and what to do if they are worried.

One of the highest risk factors for neglect and abuse of adults is the lack of visibility of this issue within our local communities – if a person has a limited or no support network, their vulnerability to abuse or neglect may increase without ready access to advice and support. Everyone has a part to play in preventing abuse or neglect and in reporting concerns when this occurs.

See It Stop It has information on:

- * Signs and symptoms of abuse
- * Guidance on what you should do if you are concerned.
- * A map to show where you are if you are in difficulties and need help.
- * A map that shows where nearby police stations, hospitals and adult services offices are where you can get help.
- * Important telephone numbers including the Police and Hampshire County Council Adult Services.
- * Information for professional including links to further information and useful websites

Depending on your device, more information and details of how to download the app can be found on either:
